## Tensor Wikipedia

January 18th, 2019 - This table shows important examples of tensors on vector spaces and tensor fields on manifolds The tensors are classified according to their type  $n\ m$  where  $n$  is the number of contravariant indices  $m$  is the number of covariant indices and  $n + m$  gives the total order of the tensor

## Tensor from Wolfram MathWorld

January 20th, 2019 - An  $n$ th rank tensor in  $m$  dimensional space is a mathematical object that has  $n$  indices and  $m^n$  components and obeys certain transformation rules Each index of a tensor ranges over the number of dimensions of space However the dimension of the space is largely irrelevant in most tensor equations with the notable exception of the contracted
